FuturEnergySystems Ltd (FES) registration with the Supply Chain Sustainability School

FES (part of the ExergInc Group) are pleased to announce its recent registration with the Supply Chain Sustainability School the UK's leading organisation in pioneering work to set new standards in climate change, modern slavery, social value, fairness, inclusion, and respect. Lookout for further updates as FES progress through to full membership as part of our commitment to the environment, communities, our people, and those working for our Enterprise Partners and our Clients that align with our mission, vision and aspirations.

OUR MISSION

Powering the Energy Transition for a Sustainable Future

OUR VISION

Climate before Profit

OUR ASPIRARTION

- Peer recognised as Best in Class, Partner of Choice
- Customer recognised as Trusted, First in Class and always providing a positive experience
- Supply chain and professional partners rate us as a respected Partner to do business with
- Sector lead as the one to beat, seen as the best customer service!

FES operates in the Power and Energy Transition sector across distinct market segments in DER, Connected Communities and Sustainable Development. FES are subject matter experts with a comprehensive core offering including consultancy services, critical network infrastructure design, engineering, construction, operation, maintenance and asset ownership.

Mike McCloy,
